

# Project Profile

## OPEX Savings for Econet Zimbabwe

### Description:

Econet Zimbabwe required cost-efficient solutions for the reduction of network OPEX costs and the improvement of network operational control.

Working closely with Econet, Likusasa designed and engineered a suite of OPEX saving initiatives to reduce fuel and site security costs and to enhance operational control.

Likusasa installed and commissioned site hardening solutions, generator-hybrid power systems, cost-efficient shelter cooling equipment, power conditioning equipment, generator oil-conditioning equipment and the Kentrox remote site management system.

The project was financed under the ECIC export assistance scheme.

### Scope of Work:

- Generator hybrid power systems
- Site hardening equipment
- Cost efficient shelter cooling equipment
- Generator oil conditioning equipment
- Power conditioning equipment
- Kentrox remote site management systems
